

Calibration Laboratory in Madrid

The Applus+ laboratory in San Fernando de Henares opened its doors in 2019, offering services in industrial calibration and legal metrology. The laboratory has the advantage of the experience brought by the team from MacCormack Calibración S.L., a company acquired by Applus+ in 2018. In November 2019, MacCormack Calibración S.L. was absorbed by Applus+ Laboratories and operates under that brand ever since.

Applus+ Laboratories is a leading company in calibration and legal metrology services in Spain. In January 2019, Applus+ opened a new calibration laboratory in San Fernando de Henares, which serves as an operational base for the Madrid region. The team from MacCormack Calibración S.L, which was recently acquired by Applus+, has also moved to these facilities, where it will continue to offer its specialist calibration services for the automotive sector and mechanical workshops.

CALIBRATION IN MADRID

Accredited Calibration: The San Fernando de Henares laboratory has the ENAC accreditation number 206/LC10.151 to calibrate measuring equipment in the following technical areas ([see our accreditation scope for more details](#)):

- Pressure and Vacuum (pressure gauges, compression gauges and vacuum gauges)
- Force and torque (torque screwdrivers, torque wrenches, torque transducers, brake testers for motorcycles, brake testers for light vehicles)
- Dimensional (calibres, outside micrometers, comparators, depth gauges, beam setters)
- Gas concentration and Optics (gas analysers, opacimeters)
- Mass (weighing scales, single-pan balance)
- Electricity (multimeters, voltmeters, ammeters, ohmmeters and clamp meters)

Our technical calibration team in Madrid can calibrate other measuring instruments and issue **our own non-accredited calibration certificate** for equipment such as fluid dispensers, headlight adjusting stations, wheel balancing machines, thermometers, cabin thermometers and refractometers. If you require an ENAC accredited calibration certificate for these or other instruments, Applus+ can offer this service through another laboratory in our network. [Contact us.](#)

COVERAGE THROUGHOUT SPAIN

Our network of laboratories and mobile units allows us to offer a local service throughout the whole of Spain. Our technicians can also travel to facilities if measuring equipment needs to be calibrated or checked on site.

Take a look at the calibration and legal metrology specialisms of each of our laboratories:

- Calibration Laboratory in Barcelona
- Calibration Laboratory in Navarra
- Calibration Laboratory in Coruña
- Mobile Calibration Units (covering the whole of Spain)
