

Structural Test Rigs, Jigs and Tools

Applus+ develops customized structural test rigs and test benches for complex aerospace applications.

- Test rigs for one-off or static tests
- Test benches simulating in-flight conditions for fatigue and endurance tests.

Our turnkey projects include:

- Design
- Calculation
- Simulation
- Manufacturing
- Assembly
- Commissioning in client facilities.

In order to improve clients' facility test capacity we may also develop specific projects for:

- Test rig integration into clients' existing facility
- Special tooling
- Facility handling machinery
